## (5) Change in Reporting Method

(Quarterly Consolidated Statements of Income)

Figures for real estate rental transactions had been recorded as "Rent income" and "Cost of lease revenue" under non-operating income and non-operating expenses. However, from the first quarter of the current fiscal year, the Company changed to report "Rent income" as "Net sales" and "Cost of lease revenue" as "Cost of sales".

This change was made in order to more appropriately present the actual state of the business operations as the Company recognizes that leasing to tenants is one of its businesses and that rental income is also one of its stable sources of income.

As a result, as for the figures in the consolidated statement of income for the third quarter of the previous fiscal year, 22,011 thousand yen presented as "Rent income" under non-operating income has been reclassified as "Net sales" and 8,100 thousand yen presented as "Cost of lease revenue" under non-operating expenses has been reclassified as "Cost of sales."
